Prekindergarten Family Engagement Plan

2018-2019

Overview:

Family engagement is defined as “the mutual responsibility of families, schools, and communities to build relationships to support student learning and achievement and to support family well-being and the continuous learning and development of children, families, and educators. Family engagement is fully integrated in the child’s experience and supports the whole child and is both culturally responsive and linguistically appropriate”. TAC 102.1003 This partnership is essential in the success of all students. The goal is to achieve and maintain high levels of family involvement and positive family attitudes toward education.
